

**METHODS AND APPARATUS FOR DETECTING AND QUANTIFYING
LYMPHOCYTES WITH OPTICAL BIODISCS**

ABSTRACT OF THE DISCLOSURE

5 A clinical diagnostic assay is performed on an optical bio disc and is read with a disc drive. A method for determining the quantity of a specific type of blood cell in a biological sample includes binding an antibody to a capture zone on the disc, providing a sample to the capture zone, remove portions of the sample that are not bound in the capture zone, and counting bound cells.
